Seeder LR603

DESCRIPTION

Seeder with three drum seeding units and belt speed controlled electronically and independently from drum speed.

It can be added to a standard full seeding line in place of the **mod. LR600** dibbling and seeding unit. The triple seeding unit allows you to sow in trays with staggered cells, place 3 different types of seed in the same cell, and increase throughput in multiple sowing (herbs).

STANDARD MACHINE CONFIGURATION

- Dibbling and drum seeding unit **mod. LR603**

Complete with:

- Drum covering unit **mod. GRR**
- Watering unit with 4 drip lines
- Pneumatic stacker

OPTIONS

- Dibbling **LRP**, blowing **LRS** and drum seeding **LRD** kit
- Belt covering unit (peat/sand) **mod. GRN/GRNS**
- System for unloading stacks onto roller table **mod. SSP**
- Stack accumulation roller table **mod. RS2**
