Mixing tank designed to mix peat and soil with fertilizers, polystyrene, agricultural perlite, pumice, expanded clay, etc. into soft, homogeneous mixes suitable for growing purposes.

The machine has been designed and built to quickly (3-5 min.) moisten the mix and supply it to other machines (soil blockers, potting machines, fillers, etc.).

**TANK CAPACITY**
1 m³

**MIXING TIME**
from 3 to 5 min

**INSTALLED POWER**
4.7 kW, 400 V
3PH+E, 50 Hz

**WEIGHT**
740 kg

**DESCRIPTION**

- Mixing tank
- Watering nozzles
- Outfeed belt with sensors

**STANDARD MACHINE CONFIGURATION**

- Wheels and lever for manoeuvring mod. SETMX1000
- Pedal for manual outfeed mod. DRPX10110
- Solenoid valve and timer kit for automatic watering
- Weighing cells
- Funnel for loading from CT2

**OPTIONS**

Technical drawing p. 78
